SOCIAL ISSUES

- Health issue
 - Physical inactivity
 - Mental health risks
 - Loneliness

Pan et al. (2026, p. 1) 'In modern society, health issues have gained increasing attention. Physical activity is a key factor in maintaining health.'

- Social Disconnection
 - Isolation
 - Reduced interaction
 - Loss of belonging
- Environmental issue
 - Climate change
 - Carbon emissions
 - Sustainability

Erickson and Brase (2020, p. 4) 'Climate change is an issue on a much larger scale and a much longer time frame than air pollution, but it is also an even more dire crisis than air pollution.'

APP CONCEPT

- Creative running
- City as canvas
- Treasure hunts
- Exploration & discovery

TARGET AUDIENCE

- 18–45 adults
- Sedentary lifestyle
- Health improvement
- Eco-conscious users
- Low-carbon travel
- Seeking social connection

ABOUT THE APP

- Visual shape: flowers, animals, food for different levels
- Run with groups, you are not alone. Choose your own groups
- Turning physical movement into creative actions
- Grey >> Colours
- Reward system: points, badges, new routes, short story fragments.
- Collaborating with local stores: discounts for the runners

AI generated image

(Hiltunen, 2025, p.1).

WHAT IS THIS GAME SOLVING

1. Social Problem: Interpersonal Disconnection

- community-based
- co-create routes together
- collective and creative experience

2. Environmental Problem: Carbon Emission & Urban Disconnection

- promoting running as a low-carbon movement

3. Health Problem : Physical Inactivity

- struggle to maintain consistency
- focus on visual shapes and reward

NARRATIVE SHIFT

Applying Jenkins' (2006) framework, we move beyond functional tracking to build an immersive Storyworld.

- Rebranding the User: From "Athlete" to "Urban Artist".
- The Canvas: The physical city becomes a digital playground.
- Core Loop: Simple, intuitive engagement—Run, Draw, and Share.

SOURCE: JENKINS (2006)

MEANINGFUL GAMIFICATION

- Intrinsic Rewards
- Unlocking new story chapters and palette colors based on creative effort, not just speed.
- Self-Expression
- Prioritizing the joy of creation over toxic leaderboard competition (Hamari et al, 2014)
- Design Logic

Using Morschheuser et al. (2017) to ensure long-term user retention through mastery.

CULTURAL & SOCIAL VALUE

Participatory Culture

Transforming users from passive consumers of urban space into active creators of culture.

- Demographics: Targeting ages 18–45 seeking real-world connection.
- Daily Life: Infusing play into the mundane to support mental health.

ETHICS RESPONSIBILITIES

Privacy by Design

As Lupton (2016) warns, location data is highly sensitive. Urban Canvas ensures:

- Local Storage: GPS data stays on the device.
- User Sovereignty: Full control over data deletion.

SOURCE: LUPTON (2016)

Well-being First

We consciously avoid "Dark Patterns":

- No "Streak-fear" mechanics.
- No fitness-shaming notifications.
- Designed for Motivation, not Addiction.

TARGET AUDIENCE

1.PRIMARY USERS:

- Especially suited for: University students,Young professionals, and Urban residents, martphones,Fitness apps, abd Gamified digital content

Wang, Myers and Sundaram (2013) explain that 'Digital natives are the new generation of young people born into the digital age'

2.FAMILIAR WITH

- Smartphones, Fitness apps, and Gamified digital content

3.WHO VALUE

- Creativity, self-expression, and experiences that can be shared online.

1.WHY WOULD PEOPLE USE THIS APP?

- Motivation Through Gamification

According to Sailer et al. (2017: 371), 'The main aim of gamification is to foster human motivation and performance in regard to a given activity.'

- Creativity & Enjoyment

Sailer et al. (2017:371) stated that 'gamification supports goal-directed behaviour.'

- Social Connection

Sailer et al. (2017: 377) stated that 'The game design element group with avatars, meaningful stories, and teammates, on the other hand, did successfully affect experiences of social relatedness.'

2.OUR APP ADDRESSES THREE CONNECTED SOCIAL PROBLEMS

- Interpersonal Disconnection
- Environmental Pressure
- Low Motivation for Physical Activity

3.KEY CORE OF PROPOSAL

- Movement creates positive change by strengthening health, connection each other, creativity, and daily habits through meaningful activity.

CONCLUSION

• CORE PROBLEMS

- Lack of exercise
- Social isolation
- Environmental issues

• WHAT OUR APP DOES

- Redefines running as a creative, social, and meaningful activity
- Encourages users to stay active and connect with others

• WE HOPE...

- Simple actions (like running) can have a positive impact on individuals and society
- Our app is not just a tool, but a way to support a more meaningful lifestyle
